SKILLS

Frontend Development:
HTML/CSS, Javascript, JQuery, ReactJs, Responsive Design

Backend Development:
PHP, Laravel, ExpressJs, MYSQL, RESTful API Development

Other Skills:
Problem Solving, GIT, Version Control, System Analysis, Debugging

EXPERIENCE

Full Stack Developer
Yaramay Computer Solution *Dec 2023 – June 2024*
As a full-stack developer at Yaramay, I designed and developed web applications tailored for Arab users. My work included creating efficient solutions for business needs, particularly in purchase tracking.

System Analysis
Pixel8 Web Solutions & Consultancy Inc. *July 2023 - August 2023*
My role involved analyzing requirements, designing efficient workflows, and collaborating with cross-functional teams to deliver successful projects.

Freelancing
Arduino Projects *2022 – Present*
I offer freelance services, including assisting high school students with capstone projects, Arduino projects, and website development. I also provide coding and programming support to other students.

EDUCATION

Computer Engineering Technology
Technological University of the Philippines Visayas
July 2020 – July 2024

Science, Technology, Engineering and Mathematics (STEM)
Kabankalan Catholic College
June 2018 – March 2020
